q10a_goalsTxt - 10a. If you wish, comment on the extent to which the goals of the course have been made clear and the extent to which expectations have been fulfilled.

10a. If you wish, comment on the extent to which the goals of the course ha...

Yes, from day 1. Professor was very clear with goals and how the course was going to work. Fantastic!

The expectations were very clear, and the course was extremely well organized. It was also extremely enjoyable.

Great class. I learned a lot. Thank you!

Dr. Reny went through a great deal of work to make this course flow as naturally as it did, and he must be applauded for it. The course is very rich and genuinely makes you feel like an expert by the end.

Definitely can say that taking this class has improved my R programming skills! Thanks Tyler!

q10b_improveLrnTxt - 10b. If you wish, make suggestions about the changes in the course or the way it is taught that would in your estimation enhance student learning.

10b. If you wish, make suggestions about the changes in the course or the w...

There is nothing to change on the professor side. Keep it like this. You have set a high standard for other professors. Time management was great, lectures were well organized and taught. Professor was always available to answer questions and help us throughout our assignments. Resources, materials were available. I wish all my other professors where like him. Thank you!

I would not change anything except perhaps asking Dr. Reny to add more "hints" to his assignments. Sometimes it felt like something needed to be done differently, and I was forced to reach out to colleagues to ask for their input. I would ask for a separate document where Dr. Reny has some hints about what needs to be done.

Nothing! This is a perfect course.

q10c_comments - 10c. If you wish, make additional comments or suggestions below.

10c. If you wish, make additional comments or suggestions below.

The following is not a comment about the professor but about the TA. The professor was the best (5 stars) and I am looking forward to take more classes with him. He is an example of the type of professors a top school must have. The following is about the TA. I would suggest to change TA. It does not matter if the TA is knowledgeable but he was not available, late to answer, not helpful at all. Had no idea what the assignments were, was lost and NEVER set a TA session. What is the point of having a TA if there are no TA sessions. Remember TA's are getting compensated, they are not volunteers. It is part of their professionalism to take the initiative and do things. Something this TA clearly lacked. If this is the role of a TA, I want to be a TA and get compensated for very little effort and professionalism.

It was a great class; I wish more courses were taught the way Dr. Reny teaches them. Not just theory but actually walking us through the work, showing us how the data is used, and immediately getting into how to do every single step of the process. Some professors only teach the theory behind data, and thus their classes made no sense when having to do the work. Yet, with Dr. Reny, there is nothing that is not taught to you or explained.

This was a great course, and the professor made it so enjoyable. He provided exceptional resources.
