Tyler went above and beyond, in terms of making this course as seamless as possible.

This class is the best course I've had at CGU in all honesty for a couple reasons. Primarily, coding is a huge aspect of any data heavy field, which political science and economics certainly are. Tyler actually knows how to code, can code well and knows how to make it clear (actually explain his code line by line). I made mistakes on each assignment, but his feedback helped me see why they were mistakes, and ways to do them better. Secondly, in addition to knowing coding, Tyler knew how to explain the literature and theory of why to do the best practices that we tried to practice. Basically, this is something that feels like a huge aspect of grad school and academia in general, that has been skimmed over in every other class.

Perfectly well.

Goals were clearly stated and structured.

Dr. Reny is a stellar professor. He feels very approachable and is always willing to give feedback to students, either in or out of class. Dr. Reny is always open to helping students and very insightful about what the field is like and how to engage more with it.

q10b\_improveLrnTxt - 10b. If you wish, make suggestions about the changes in the course or the way it is taught that would in your estimation enhance student learning.

10b. If you wish, make suggestions about the changes in the course or the w...

---

NA

Wouldn't change a thing. Excellent teaching methodology and class. Would highly recommend it to all incoming PhD students and any second year PhD students as well.

No complaints about this course, this course feels like it's the most applicable and can be directly applied to my research and I can't think of any legitimate constructive criticism I could offer Tyler.

None

q10c\_comments - 10c. If you wish, make additional comments or suggestions below.

10c. If you wish, make additional comments or suggestions below.

---

NA

The professor was extremely helpful and always willing to provide advice and comments on how to better approach homework and projects. I would say he is probably the most flexible and helpful professor I've had, and I hope you appreciate how good he is!

Thanks!
